Making the Move to RDA Chamyia Pompey Kincy 2014-01-13 Making the Move to RDA: A Self-Study Primer for Catalogers is aimed at MARC catalogers who currently create AACR2 records and need to transition to the new Resource Description and Access (RDA) environment. Since both RDA's structure and content differ from AACR2 in many respects, this primer will first detail the development and rationale for RDA as well as its

intended goals, principles, and objectives. It will then explain RDA's theoretical underpinnings—collectively known as the FRBR Family of Models.

Analysis of Ambulance Complaints: Databasing, Statistical Reporting, and More Steven Gilbert 2020-03-19 This book is meant to be a reference book for ambulance investigators. Its primary focus is the importance of the investigative unit's database, especially databasing information from individual complaints, as well as self-generated investigations. It includes a concept called "the family

of complaint types”, which lists 494 related reports. Additionally, there are 543 other database reports that pertain to one or more of 46 investigative categories. From an investigative point-of-view the book covers what information should be databased, why so much information should be databased, the investigative benefits of entering so much information into the database, four sources for statistical information, the presentation of investigative stats, and lastly, the importance of a yearly Investigative Unit recap report. The first section covers a potpourri of topics which are not database related. These topics include information on complaints, what we can learn from complaints, investigations and cases, a formal investigative process, the importance of contacting the complainant as soon as possible after being assigned the case, a coverup is always worse than the original incident, negative EMS perception, the Media, the use of drones in EMS investigations, investigative vital signs, and the history of the investigative unit. The remainder of the sections pertain to databasing.

It explains management from the point of view of the contract, just as it interprets the contract from the point of view of management. Thus, the approach highlights the great inherent potential of contracts for managing companies, transactions and business relationships. The book addresses students as well as practitioners and gives insights into the usage of contracts to manage companies or relationships. It covers contract handling from preliminary deliberations to negotiations, implementation, and all the way to the evaluation of the contract within the company. Furthermore, it provides competencies to design and implement a contract and to organize the relevant processes. The Content In Part 1, the book explains the

theoretical foundations of Contractual Management; in Part 2, the application of the approach is illustrated through case studies which cover various sectors, industries, company sizes, contract types, and management situations. Theory part: Contractual Management – A Holistic Approach to a Diverse Issue. Case study part: 11 case studies arranged according to specific contract-related topics: Information and Communication – Change – Enterprise Networks – Conflict – Accounting and Financing – Legal Compliance – Societal Steering. The Editors Professor Dr. Ralph Schuhmann: After holding a senior management position in industry, Ralph Schuhmann now teaches Business Law at Ernst-Abbe-Hochschule in Jena, Germany. He is the scientific director of the Contractual Management Institute at SRH Hochschule Berlin and has published various articles on contract law and contract management. Professor Dr. Bert Eichhorn: Before his appointment as professor for International Law and Business Law at SRH Hochschule Berlin, Bert Eichhorn worked as a legal consultant at the EU Parliament and as a lawyer. He has published numerous articles in national and international scientific journals in the area of contract management and international law. He is the managing director of the Contractual Management Institute at SRH Hochschule Berlin.

Aspen's Health Care Quality Review
Jane Lowers 1999 Aspen's Health Care Quality Review (1999) compiles current, real-world examples of hospitals, health plans, physician practices and other organizations

applying quality improvement theory and reaping reduced costs, improved patient satisfaction and improved health outcomes as a result. Each section (organizational quality, quality theory and practice, quality tools and measurement, quality in care) profiles top health care providers around the country and tracks not only clinical improvements but also the organizational changes and philosophy that made them possible. Contact information for each chapter allows readers to go straight to the source for more details, and a wealth of statistics, charts and easily replicated tools help readers apply the information at their own facilities. With Aspen's Health Care Quality Review you'll get award winning articles from our other quality publications, for example, Russ Coile's Health Trends, The Quality Letter for Healthcare Leaders, QRC Advisor, and Journal of Nursing Care Quality. No more combing through various resources for the information you need. We have done it for you!

Using Casemix System for Hospital Reimbursement in Social Health Insurance Programme Syed Aljunid
2020-11-26 Social Health Insurance (SHI) is one of the vehicles in achieving Universal Health Coverage. However, in many low- and middle-income countries, implementation of SHI failed to provide efficient and effective coverage due to poor provider payment method. Indonesia has introduced social health insurance in 2014. With the population of more than 270 million, Indonesia is the biggest country in the world that implemented SHI with casemix system (INA-CBG) as the prospective provider payment method. In this book, we presented an outcome of a study implemented in the largest hospital in Jakarta, Indonesia that compared the impact of using casemix

system as provider payment method with fee-for-service. A total 32,227 outpatients and 8,270 inpatients medical records were reviewed and included in the study. In addition, a survey was also conducted among billing administrators to assess the cost of the billing process and their perceptions on the two reimbursement methods. The total hospital charges, length of stay of inpatients, rate of unnecessary admissions and cost of billing process were among the indicators of efficiency compared in the study between the two provider payment methods. The book provides comprehensive evidence to confirm the advantages of casemix system as an efficient provider payment method in SHI programme.

Death House Larry R. Leichter
2001-10-26 There is an excellent chance this book will save your life. You will see doctors, the practice of medicine, and community hospitals as you have never seen them before. You will learn about things you never could have believed existed before. For what is written in this book has never been told before in its entirety, anywhere and by anyone.

Doctors with respectable credentials and good reputations are harming, maiming, and yes, murdering their patients. They are doing it with the support and blessings of the hospitals at which they work. And they are doing it with only their interests, not their patients' welfare in mind. The reason? In one word: MONEY. Dealing with a different incident of physician caused abuse, each chapter will contain an anecdotal story based on true events that happened to real patients at the hands of real doctors. Though in certain instances the patient's actual first name will be used, at all times the physician perpetrator's anonymity will be maintained. There should be nothing more important to you than your life and the lives of your loved ones. You must not let these DEATH HOUSE physicians who MURDER FOR MONEY take from you that which is most precious.
