**Handbook of Research on Character and Leadership Development in Military Schools** Ryan, Mark Patrick 2021-01-22 Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school/college education and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The Handbook of Research on Character and Leadership Development in Military Schools synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national, and both private and public, military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies both in the United States and internationally along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.

**Leadership Development in Context** Michael G. Hasler 2010 This study explores the extent to which organizational culture and operational environment influence the leadership activities of an organization in the midst of significant organizational change and whether culture drives leadership development or vice versa. After exploring several different leadership theories, the study focuses on the concepts of transformational leadership as the theoretical foundations for the leadership component of the research. Likewise, the study builds on organizational theory and sociological foundations to focus on the work of Schein and Hatch for organizational culture, and Schneider for key concepts used in the development of person-organization fit. The research in this study concentrated on the manufacturing organization of a large, well-known company based in the US. This organization is in the midst of considerable organizational change in response to upheavals in its markets, its technology, and its manufacturing strategy. Research was conducted through collection of data from public sources, review of internal organization documents, a survey of perceptions of the organizational culture held by the staff, and detailed interviews with a cross section of the professional and managerial staff involved in the leadership development process. The results of the research and analysis showed that despite strong efforts by executive leadership and developing leadership at all levels to create a more compassionate organizational culture, the crisis facing the organization caused even the most committed and well-meaning individuals to revert to a cultural norm of a driven, results-oriented organizational culture. The interviews and survey data led to conclusions that culture change is a long term effort, that it requires executive leadership commitment, vision, and constant communication to reinforce the vision; and is best addressed through leadership development in the younger staff with less personal investment in the status quo.

**Strength-Based Leadership Coaching in Organizations** Doug MacKie 2016-03-03 Positive organizational psychology, with its focus on the identification and development of strengths, is a natural ally to executive development and leadership coaching. However, this approach is only just beginning to come to the attention of organizations and consequently, the research base for strength-based coaching is in its early stages of development. Strength-based Leadership Coaching in Organizations reviews strength-based approaches to positive leadership development and evaluates the evidence for their effectiveness, critically assesses their apparent distinctiveness and considers how strengths can be reliably assessed and developed in their organizational context. Strength-based Leadership Coaching in Organizations reviews key areas of leader and team development and describes a model of strengths development in organizations. It discusses the application of strength-based leadership coaching from the managerial and external perspective within the context of career stage, seniority, role challenges and organizational need in order to facilitate meaningful change. Finally, it covers the limitations of the strength-based approach to leadership development together with the challenges of integrating positive leadership development. It shows exactly what a strengths focus is and that there is increasing evidence that this approach does get results. Where other books focus on one model of identifying strengths, this book offers a balanced and critical examination, showing how to apply a positive strength-based approach.

The other overlapping niche areas affecting the civil service scope will ensure more interest in and readability of the findings showcased in this proceedings book; • the popular and contemporary measurement techniques and methodologies employed within the scopes of the social sciences and humanities; • the noticeably changing trends in administrative science and technology, which will greatly impact the governments of the world, allowing the development of a better understanding of governmental processes and their impact on key performance and e-service deliveries. The reporting on technology-based services will improve the public sector's agility; • a knowledge-sharing agenda for other developing and less developed nations to emulate; • some of the major generic developments that have taken place in these thematic areas of CoAST 2013.

**Management and Leadership Development** Christopher Mabey 2007-12-12 `This is the first really thought-provoking book that I have read on management development. It is a book primarily addressed to students, but in this field, we are all students. It merits a wide readership both among practising managers as well as among those responsible for developing them' - Max Boisot, ESADE `Mabey and Finch-Lees inject a breath of fresh air into the management development field by expanding upon its heretofore functionalist base. They offer an informative critique of mainstream views, featuring alternative discourses to examine such hard questions as why management development hasn't quite delivered on management's considerable investment in it. As a veritable tour de force in its absorbing integration and review of a large tract of literature, the book informs both management scholars and practitioners what might be expected from management development's intended but also unanticipated outcomes' - Joe Raelin, Northeastern University `In a well-written, accessible and yet sophisticated text, Mabey and Finch-Lees show themselves to be as familiar with the latest in management development practice as they are with the sometimes arcane theoretical literature that surrounds it. Its great strength is to recognize the plurality of discourses - some overlapping and complementary, others distinct and oppositional - about the subject. This book can be recommended as a unique resource for students and scholars of management development' - Chris Grey, University of Warwick This book represents a significant step forward in the theory of management and leadership development. It offers an international perspective in this era of globalisation and a new and questioning perspective on the common belief that leadership is something completely different to, and more important than, management. This book will be of great help to the serious theorist and researcher of management and leadership development. It is an invaluable point of reference for a broad range of theory and research in this area, which it summarises with admirable brevity and clarity' - John G Burgoyne, Lancaster University Management School and Henley Management College Management development is a potent and high-profile human resource activity, involving some of the organizations' key players and attracting huge hopes and investments from governments, organizations and individuals alike. Yet at several levels, the high expectations often remain unfulfilled. So why is this a subject and activity that continues to command such intense interest from scholars and practitioners alike? Chris Mabey and Tim Finch-Lees provide a fresh analysis of the concept and practice of management and leadership development (MLD). Grounded in research, the authors set out the current state of management and leadership development practices, before introducing readers to competing theories of MLD and offering them a more critical perspective. Throughout the book, ideas are illustrated by international case studies and vignettes that evoke the perceptions and interests of the whole range of stakeholders in the management development process. Management Development has been written for upper level undergraduate and masters level students pursuing courses in HRM, HRD, Leadership Development, Organizational Behaviour, Management, Organization Change, Personnel Management, and training and development modules.

**Early Development and Leadership** Susan E. Murphy 2012-03-29 Today we often look to our leaders in business, government, or the social sector, to make effective decisions in a complex world. Whether they are asked what steps to take to improve competitiveness in a global economy or to make tough ethical choices, well-trained leaders are critical to organizational effectiveness. Although we know much about leadership development for individuals after they take their first job, we know relatively little about their earlier experiences that contributed to their interest in leadership or subsequent effectiveness as leaders. This volume brings together researchers who explore leadership at different points before individuals enter the workforce and asks important questions surrounding definitions of leadership behavior, necessary leader skills and age-related leader tasks, factors contributing to development of leader identity, and ways to improve the process of leader development. With contributions from well-known leadership researchers such as Robert Sternberg, Howard Gardner, Bruce Avolio, and Susan Komives, the volume shows research evidence for factors such as early childhood and youth experiences on leadership development, which have implications for the way we understand and train leadership in today's organizations.

**The SAGE Handbook of Management Learning, Education and Development** Steven J Armstrong 2009-05-07 The scholarship of management teaching and learning has established itself as a field in its own right and this benchmark handbook is the first to provide an account of the discipline. Original chapters from leading international academics identify the key issues and map out where the discipline is going. Each chapter provides a comprehensive and critical overview of the given topic area, highlights current debates and reviews the emerging research agenda. Chapters embrace the study of organizations as a whole, the concepts of individual and collective learning, the delivery of formal management education and the facilitation of management development. Through consideration of these themes the Handbook analyzes, promotes and critiques the contribution of management learning, education and development to management understanding. It will be an invaluable point of reference for all students and researchers interested in broadening their understanding of this exciting and dynamic new field.

**Organizational Behavior Today** Stanley C. Ross 2021-03-03 This exciting new introductory text offers a new perspective on teaching organizational behavior by framing the organization as the vehicle for implementing strategic management processes, while also breaking down how the different components of an organization are designed to work together. Unlike traditional OB texts, Organizational Behavior Today emphasizes a "big picture" examination of how organizations function in a Darwinian world, in which the primary goal of an organization is survival. The book introduces readers to the three stages of the strategic management process: strategy formulation, strategy implementation and strategic control, thereby linking the organization to its mission, vision and strategic goals. Essential OB concepts such as work processes, policy, worker behavior, reward system, change management and leadership development are covered, and the book also highlights the impact of technology on organizations. To support student comprehension and bring the study of OB to life, the book includes vignettes highlighting real organizations who have implemented OB processes, either successfully or unsuccessfully. End-of-chapter questions ensure that students can apply the information learned effectively. Accompanying online resources for this text, available at [www.routledge.com/9780367695095](http://www.routledge.com/9780367695095), include a curated list of relevant video content. The book is suitable for undergraduates and graduate students completing a first course in Organizational Behavior, as well as a practical reference for current managers wishing to optimize organizational performance.

**Post-Heroic Leadership** Miha Skerlavaj 2022-01-03 This pioneering new book sets out to categorize context, process, and outcomes of post-heroic leadership. Complexities of modern business environment along with fundamental functioning of human psychology require us to make a paradigm shift in the way we perceive and practice effective leadership. The author argues that in order for businesses to succeed in the times to come, leaders need to move away from ego-centered leadership toward post-heroic leadership – a leadership that emphasizes servant and shared practices, puts task and collective front and center and leaders' ego in the background. Providing a deeper understanding of the post-heroic leadership across industries and disciplines, the book starts by elaborating on the zeitgeist and need for a new type of leadership. It highlights the process and elements of post-heroic leadership in action, such as post-heroically leading change, developing culture of trust with feedback, and sustainable and responsible post-heroic leadership. Finally, the book focuses on the outcomes of post-heroic leadership, including resilience and innovation. Featuring mini-case studies from leaders in healthcare, family entertainment, ICT, haute cuisine, and manufacturing to name a few, this book provides a thorough understanding of this new wave of leadership and a platform for further research.

**A Multi-level Theory of Leader Development** Daniel Scott DeRue 2007

**Leadership Development & Practice** Richard Hall 2014-12-19 Emerging complexities have arisen regarding leadership, leadership studies and leadership development requiring new approaches and new styles of organizational leadership. Changing environmental conditions including globalisation, climate change, increased market volatility, and shifts in the balance of power in the global political economy suggest the need for more creative, interactive and longer-term strategic leadership. In order to address and react to these shifts in understanding, one must review some essential questions: what constitutes leadership in the organisation, what is it that leaders actually do, or should do, and what can leadership achieve? Once confronted, the critical question addressed in this work is: how do we develop leadership to be more responsive to contemporary organizational conditions. This major work on Leadership Development and Practice will engage this question by drawing together some of the most important and influential research from the related domains of leadership practice and leadership development. Volume 1 opens with a newly-written introduction, which explains the rationale for the major work, addresses the key questions set out above and outlines its structure, providing the reader with a clear, concise roadmap for all four volumes. Volume 1: Individual Leader Development Volume 2: Leadership Development in Context Volume 3: Leadership Development in the Plural Volume 4: Critical Approaches and Perspectives

**Leadership** James H. Dulebohn 2022-02 "As we enter the third decade of the twenty-first century, we are seeing a renaissance of context in influencing leadership, leader-follower relations, and leader effectiveness as well as a recognition of the tripartite nature of leadership. To fully understand and appreciate leadership, one must see the multiple parts of it as well as the connections among them. Leadership is multi-dimensional; leadership depends on leaders, followers, and context. Leadership research in the past three decades has been dominated by interest in neo-charismatic leadership styles and a focus on leader-member exchange in leader-follower relationships. Recently other approaches to leadership, such as ethical and authentic leaders, have garnered greater attention in response to the moral and ethical challenges in the workplace. Additionally, established approaches to leadership emergence and development have been challenged by their relevance to diverse work forces and issues of inclusion. This twelve article volume includes an outstanding roster of established and emerging leadership authors who tackle questions of leadership at the intersections of leaders, followers, and context. The volume opens with two articles that set the stage for the current state of leadership research and paths for its future including a commentary by Edwin Locke and Gary Latham on current management research practices and an action-oriented review of leadership research from the start of the 21st century. The volume is organized around three themes: leadership and diversity, leader-follower relationships, and systems of leader, follower, and context. Articles in the volume advance diversity research with an integration of leadership and diversity theories that demonstrate the former's need for re-examination in light of the latter, a systematic development of inclusive leadership theory, and a close examination of immigrant ethnic identity. The authors of several articles expand our understanding of leader-follower relationships in the context of teams and alliances, the contextual boundaries of authentic leadership theory, and the authentic leader's potential impact on harassment in organizations. The volume culminates with three demonstrations of leadership as systems of leader-follower-context interaction, including a close examination of the toxic triangle's manifestation in university scandals, a micro-process model of power and leadership, and a configurational approach to studying leadership. The volume is designed primarily for scholars in the fields of human resource management, organizational behavior, and leadership. It also well serves the needs of instructors and students in master's and doctoral courses in leadership or organizational behavior. Each article is grounded in managerial context that will appeal to practitioners in the field"

**Enhancing Leadership Development in Kenyan MBA Programs** Benson Katulwa 2015-11-19 The purpose of this study was to investigate the extent to which MBA graduates perceived their MBA education experience to have contributed towards the development of global leadership competencies in their lives. The collected data related to what the respondents perceived to have observed vis-à-vis what they would have considered adequate for the development of global leadership competencies. Stratified sampling technique was used to select the respondents using disproportionate allocation of respondents within strata. Data relating to the key research objectives were analyzed using nonparametric tests specifically the Chi-square goodness of fit test and Wilcoxon signed ranks test. The study found a significant relationship between selected global leadership competencies and career success. Considering the amount of time allocated to the development of selected competencies, frequency of use of selected instructional methods, integration of theory with practice and, integration of MBA education with leadership values and ethics, the study concluded that the MBA education as offered in Kenyan business schools is not perceived by the respondents to be significantly enhancing the development of global leadership competencies among MBA graduates.

**Learning Leadership** James M. Kouzes 2016-05-02 From the bestselling authors of The Leadership Challenge and over a dozen award winning leadership books, James M. Kouzes and Barry Z. Posner have written a new book that examines a fundamental question: How do people learn leadership? How do they learn to become leaders? Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader (ISBN: 978-1-119-14428-1; Wiley, May 2016) is a comprehensive guide to unleashing the inner-leader in us all and to building a solid foundation for a lifetime of leadership growth and mastery. The book offers a concrete framework to help individuals of all levels, functions, and backgrounds take charge of their own leadership development and become the best leaders they can be. Arguing that all individuals are born with the capacity to lead, Kouzes and Posner provide readers with a practical series of actions and specific coaching tips for harnessing that capacity and creating a context in which they can excel. Supported by over 30 years of research, from over seventy countries, and with examples from real-world leaders, Learning Leadership is a clarion call to unleash the leadership potential that is already present in today's society. According to Kouzes and Posner, "Leadership makes a significant difference in levels of engagement and commitment and is perhaps the most important asset to promote organization, yet recent research points to a shortage of leaders. It is a serious global concern. The world needs more exemplary leaders in order to promote high-performing workplaces and inspire feelings of greater self-worth and meaningfulness. The shortage, however, is not because of the lack of potential talent. The people are out there, the eagerness is out there, and the capability is out there. The shortage results from prevailing myths—myths about talent, strengths, position, self-reliance, and effort—that inhibit the vast majority of leaders from shining and organizations from realizing the full benefits of the talent they already have." Learning Leadership provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. Emerging leaders, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamental for becoming the best leaders they can be. Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: Believe in Yourself. Believing in oneself is the essential first step in developing leadership competencies. The best leaders are learners, and they can't achieve mastery until and unless they truly decide that inside them there is a person who can make a difference and learn to be a better leader than they are right now. Aspire to Excel. To become an exemplary leader, people have to determine what they care most about and why they want to lead. Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. Challenge Yourself. Challenging oneself is critical to learning leadership. Leaders have to seek new experiences and test themselves. There will be inevitable setbacks and failures along the way that require curiosity, grit, courage, and resilience in order to persist in learning and becoming the best. Engage Support. One can't lead alone, and one can't learn alone.It is essential to get support and coaching on the path to achieving excellence. Whether it's family, managers at work, or professional coaches, leaders need the advice, feedback, care, and support of others. Practice Deliberately. No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of experience studying the practices of extraordinary leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves, to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.

**Leadership and Followership in an Organizational Change Context** Khan, Sajjad Nawaz 2021-09-24 Often it seems that people place a spotlight on leaders and disregard the probability that the success of the organization lies somewhere in the followers. While highlighting topics such as leadership style, employee engagement, and succession planning, this book is ideally designed for managers, executives, directors, upper-level management, business professionals, academicians, researchers, industry professionals, and students seeking current research on the types of changes that organizations are facing and how such changes can be managed.

The all-original chapters include discussions of leadership frameworks, competencies for public leaders for the "new governance," and strategies for senior leaders in government. The book's wide-ranging coverage includes in-depth discussions of specific approaches to learning methods such as action learning and social artistry, as well as presentations of leader development models such as transformational stewardship and global leadership. The contributors present experiences from real-world leadership development programs, and the book situates leader development within the current trends of networks, collaboration, and boundary-crossing work in the public sector.

**Ontwikkelingsopdrachten** Cynthia D. McCauley 2008 In the years since that report was published, we have learned more about development in place from research, from working with managers and organizations that are making use of developmental assignments, and from our colleagues in the field. We believe it is time once again to consolidate our knowledge into one tool to help leaders add developmental assignments to their own jobs and help others do the same. The tables inside this book are full of assignments. You'll also find cross-references to CCL's assessment tools: 360 BY DESIGN®, Executive Dimensions®, Benchmarks®, Prospector®, and SKILLS.

**Leadership Development in Emerging Market Economies** Alexandre Ardichvili 2017-01-01 This edited volume provides an overview of the current state and indigenous practices of leadership development (LD) in a select group of emerging market economies, including BRICS, Southeast and East Asia, Middle East, Eastern Europe, and Africa. While some authors focus exclusively on LD in the business sector, others discuss such topics as LD in higher education, the role of higher education institutions in leadership development for managers and executives, the role of religious institutions, and LD in the government and public sectors. **Globalization of Leadership Development** Jingjing Wang 2014-08-08 It is generally understood that some effective leadership behaviors of Chinese managers differ from those of Western managers. It has also been debated controversially whether Chinese learners can benefit from Western learning approaches. Taking these two aspects into consideration, Jingjing Wang examines whether a global leadership development program from Western countries has as much impact on Chinese managers as on Western managers. She conducts the empirical study within one global corporation originating from Germany and the data were collected from Germany and China. Based on the core results of the study, implications for the globalization of leadership development are discussed.
