Eleven articles first published between 1936 and 1976, with some new material.

Mastery and Escape Jewel Spears Brooker 1994

This book examines modernism as a cultural and

literary phenomenon. It distinguishes between two groups of modernists, one consisting mostly of exiles and characterised by internationalism and intellectual complexity, the other comprising primarily artists who consciously resist the aesthetic and political tendencies of the first group. The focus here is on the first group, and more particularly, on T.S. Eliot. Included are chapters on Mallarmé and Hulme and extended discussions of Yeats and Joyce. In the social sciences, special attention is given to Frazer, Freud, and F.H. Bradley. Viewing modernism as an ideological term, the text evaluates contending theories, including those of Jeffrey Perl and of

- Sandra Gilbert and Susan Gubar.
- The Sherborne Missal** Janet Backhouse 1999 This superbly illustrated study introduction explores its creation and history of the 15th century Sherborne Missal and assesses its importance as a masterpiece in the history of English art.
- Traditional Justice in Practice* Boyane Tshehla 2005

British Books in Print 1968
- The California Regulatory Law Reporter** 1987
- Troubled Waters Ben Witherington 2007 Baptism has been a contested practice from the very beginning of the church. In this volume, Ben Witherington rethinks the theology of baptism and does so in constant conversation with the classic theological positions and central New Testament texts. By placing baptism in the context of the covenant, Witherington shows how advocates of both believer's baptism and infant baptism have added some water to both their theology and practice of baptism
- Bulletin of the Atomic Scientists* 1966-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.
- The Women's Side** Clemence Dane 1926
- New-Church Messenger* 1906
- The Saturday Review of Politics, Literature, Science, Art, and Finance* 1869
- Incest, Drama and Nature's Law, 1550-1700**
Richard Anthony McCabe 1993-11-25 This is a full-length study of incest in English Renaissance and Restoration drama. Richard McCabe's comprehensive survey offers a literary history of this theme, informed by an investigation of the

intellectual background, with particular emphasis on changing concepts of natural law, and consequent reassessments of classical tradition. It examines a wide range of theological, philosophical, legal and literary sources, in the context of modern psychological and sociological theories of family development. Extensive comparisons with classical models and contemporary European dramatists, from Tasso to Corneille and Racine, explore the volatile association between dramatic form and emotional content, structural experiment and sexual ambivalence. The centrality of the family to all human relationships, and the mutual reflection of familial politics and the patriarchal state make incest a powerful metaphor for the ambivalence of all concepts of 'natural' authority, and for various forms of social and political revolt.

The Canon Law of the Roman Catholic Church and the Church of England Rhidian Jones
2000-11-02 This highly useful book provides quick reference and accessibility to the current canon law of both churches. The entry for every canonical term presents its definition and the law relating to it in each canon. There are cross-references throughout to help the reader make further significant connections. Also included are terms not easily translated across the two canons, and some common terms from the Eastern Catholic Church. The appendices contain changes to the Universal law of the Roman

Catholic Church which are outside the 1983 Code of Canon law. At a time when Christians are increasingly working side by side, this is an essential resource for pastoral workers, scholars and clergy in all the churches.

The Brahmo Samaj and the Shaping of the

Modern Indian Mind David Kopf 1979 As the forerunners of Indian modernization, the community of Bengali intellectuals known as the Brahmo Samaj played a crucial role in the genesis and development of every major religious, social, and political movement in India from 1820 to 1930. David Kopf launches a comprehensive generation- to-generation study of this group in order to understand the ideological foundations of the modern Indian mind. His book constitutes not only a biographical and a sociological study of the Brahmo Samaj, but also an intellectual history of modern India that ranges

from the Unitarian social gospel of Rammohun Roy to Rabindranath Tagore's universal humanism and Jessie Bose's scientism. From a variety of biographical sources, many of them in Bengali and never before used in research, the author makes available much valuable information. In his analysis of the interplay between the ideas, the consciousness, and the lives of these early rebels against the Hindu tradition, Professor Kopf reveals the subtle and intricate problems and issues that gradually shaped contemporary Indian consciousness. What emerges from this group portrait is a legacy of innovation and reform that introduced a rationalist tradition of thought, liberal political consciousness, and Indian nationalism, in addition to changing theology and ritual, marriage laws and customs, and the status of women. Originally published in 1979. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Social Work in Social Change Nicci Earle 2008

This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education, Science & Skills Development. It follows a pilot study on medical doctors, published in 2006 entitled *Doctors in a Divided Society: The profession and education of medical practitioners in South Africa*. Like the other studies in the series, this study involved developing an understanding of the professional milieu and professional labour market of social workers. As the implementers of government social policy, social work professionals have been at the forefront of grappling with the practicalities of the changes in focus, approach and methods of social security and social service delivery since 1994. It examines developments in the education and training of social workers within the democratic dispensation, the most significant of which is the development of a national, standardised Bachelor of Social Work degree. The study also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female, and that enrolment has increased significantly. However, the study also shows that graduation trends have been negative and losses due to emigration are an additional concern. Given the scarcity of these professionals against the demand for their services, understanding the factors that contribute to this picture are critical to

effective intervention.

What's in a Relative? Joan Bestard-Camps

1991-10-22 In this ground-breaking study based on ethnographic research in Formentera, in the Balearic Islands, the author demonstrates that European kinship can become central to anthropological explanation once it is understood from a symbolic and cultural perspective. This book is an outstanding example of ethnographic analysis which is sensitive to the findings of demographic and historical research.

Number Two to Tutu Michael Nuttall 2003 This book tells a story involving two South African church leaders, Desmond Tutu and Michael Nuttall, during a dramatic and decisive time in the history of their country, the 1980's and 1990's. Tutu was, and is, well known and acclaimed across the world, firstly for his courageous prophetic witness against apartheid and all it stood for, and secondly for his chairing of the Truth and Reconciliation Commission. Nuttall was Bishop of Natal when Tutu was Archbishop of Cape Town. His election in 1989 to be the bishop next senior to the Archbishop meant that he was drawn into a remarkable partnership. This book opens the curtains on some intriguing and transforming situations in which they became involved. It shows how the church, through its leaders as well as in other ways, played an important part in South Africa's journey from being a racist tyranny into acquiring a new

democratic dispensation. It also shows how the church attended to its own internal needs and challenges at the same time.

Arts & Humanities Citation Index 1998

Opera Muliebria David Herlihy 1990 In the early Middle Ages, until as late as the thirteenth century, women were active and independent participants in many sectors of economic life. Even apart from agriculture, they were prominent in all phases of cloth making, in brewing, medicine, education, administration, and in the dispensation of religious counsel. In the late Middle Ages, clearly so by the fifteenth century, women lost that prominence as well as their economic independence. Using a great variety of original sources, both literary and statistical, David Herlihy vividly demonstrates that the subordination of women within a household economy was specifically the product of the late Middle Ages. Opera Muliebria, the medieval Latin term for "women's labors," is the first comprehensive survey of women's participation in economic activities throughout Europe from ancient times to about 1500. Herlihy illustrates how medieval women lived and worked, and how their lives were transformed as the Middle Ages ended. He traces the dramatic change in their participation in productive enterprise to the establishment of guild monopolies and reveals that the virtual confinement of women's labors to work within the home was not an ancient

arrangement, but rather the heritage of the late Middle Ages. Covering the entire continent of Europe for over a millennium of its history, Herlihy's work contributes to a better understanding not only of medieval women but of the entire social world of the Middle Ages. Author note: David Herlihy is Mary Critchfield and Barnaby Keeney Professor of History at Brown University and President of the American

Historical Association in 1990. He is the author of several books including *Medieval Households*.
