Airplane Design Karl Dawson Wood 1954 This is the tenth edition (1954) of K.D. Wood's Airplane Design. Despite its age, it is the favorite of amateur aircraft designers, because it sits on the cusp between

propeller-driven, low subsonic airplanes, and the huge increase in military performance represented by supersonic and hypersonic aircraft, and in commercial value represented by high-subsonic, jet-propelled airliners. It is also situated inside the early, heroic period of helicopter development, and Wood's knowledge of that (then)exotic aircraft comes out clearly. He still includes wood as an aircraft material, and geodetic structures and tube trusses as structural arrangements, without neglecting the monocoque and semi-monocoque metal structures that were then becoming more common. He also covers seaplanes and flying boats, a topic essentially ignored today. He recognizes the potential of fiber-reinforced plastics and discusses them to the extent possible at the time. This is the companion volume to K.D. Wood's Technical Aerodynamics, third edition.This improved facsimile reprint has a new, detailed table of contents, accurate pagination and improvements to some of the illustrations.

Brand! Naomi Klein 2019-11-15 Al meer dan dertig jaar weten we dat er een klimaatcrisis aan zit te komen, maar met die kennis hebben we weinig gedaan. Pas toen Greta Thunberg 'Brand!' riep en 1,6 miljoen scholieren wereldwijd haar voorbeeld volgden, begon de urgentie van de situatie werkelijk door te dringen - en nog gaan de meesten van ons door met leven zoals we dat altijd al hebben gedaan.

Naomi Klein schrijft al tien jaar over het klimaat. Tien jaar waarin de aarde onherstelbare schade heeft opgelopen en de politieke landkaart ingrijpend is veranderd. Te lang hebben we het economische systeem van ongelimiteerde consumptie en ecologische uitputting in stand gehouden. Voor Klein - en voor steeds meer mensen - is er maar één conclusie mogelijk: de economische, sociale en ecologische crises waar we ons in bevinden, houden sterk verband met elkaar. We moeten onze beschaving ingrijpend veranderen. Het is tijd voor een nieuwe groene politiek.
