Orban’s Oral Histology and Embryology (Package Deal) G.S. Kumar 2019-08-20

De oorsprong van l’art nouveau Gabriel P Weisberg 2004 The opening of Sigmund Bing’s gallery L’Art Nouveau had been an eagerly expected event in the Paris art world throughout the latter half of 1895, since Bing first announced that he would be soon exhibiting artistic furniture. The doors finally opened on 26 December 1895 as visitors poured in at 22 Rue de Provence to admire Bing’s collection. Beginning with Bing’s special feeling for Asian art, the author discusses his many other eclectic interests in art. Over 300 colour illustrations show the objects that were traded in his gallery: Tiffany glass, paintings and sculptures by Henri Toulouse Lautrec, Rodin, Claudel and Vuillard, as well furniture, ceramics and jewellery by Van de Velde, Colonna, De Feure and Gaillard. The book is based on extensive archive research, tracing destinations of the art objects that Bing traded to collectors and museums or sponsored personally. The authors show how one man, an art dealer, became an international trendsetter who influenced the canon in Europe and the US. The result is a renewed appreciation of Sigmund Bing’s role as the principal founder of the new style that carries the name of his gallery: Art Nouveau.

Lokale anesthesie in de tandheelkunde. J.A. Baart 2013-08-17 Lokale anesthesie in de tandheelkunde is een leesbaar praktijkboek met kwalitatief hoogwaardige anatomische tekeningen en foto’s in kleur. Het is een onmisbaar naslagwerk voor tandartsen, mondzorgkundigen en degenen die hiervoor studeren. Het boek geeft veel praktische informatie over de wijze waarop anesthesie kan worden toegeediend en over de intraorale gebieden die bij toepassing van de verschillende methoden zijn verdoofd. De betekenis van deze handeling kan nauwelijks worden onderschat. Enerzijds zorgt lokale anesthesie ervoor dat de patiënt comfortabel en pijnvrij een tandheelkundige behandeling kan ondergaan, anderzijds stelt het de tandarts in staat deze behandeling rustig en geconcentreerd uit te voeren. Grondige kennis van de anatomie, de farmacologie en de wijze waarop de verdoving moet worden toegeediend bij volwassenen en kinderen, is daarvoor onmisbaar. Ook dient men te beschikken over kennis van de lokale en systemische complicaties en het gebruik van lokale verdoving bij medisch gecompromitteerde patiënten. Aan deze tweede, geheel herziene, druk is een nieuw hoofdstuk over computergestuurde anesthesie toegevoegd. Daarnaast is op verschillende plaatsen nadrukkelijk aandacht besteed aan aspecten van veiligheid, milieu en steriliteit en komen ook nieuwe anesthesietechnieken aan de orde.Aan deze tweede, geheel herziene, druk is een nieuw hoofdstuk over computergestuurde anesthesie toegevoegd.
