Postcolonial Melancholia Paul Gilroy 2005 In *Postcolonial Melancholia*, Paul Gilroy continues the conversation he began in his landmark study of race and nation, “There Ain’t No Black in the Union Jack,” by once again departing from conventional wisdom to examine—and defend—multiculturalism within the context of a post-9/11 “politics of security.” Gilroy adapts the concept of melancholia from its Freudian origins and applies it to the social pathology of neoimperialist politics. His unorthodox analysis pinpoints melancholic reactions not only in the hostility and violence directed at blacks, immigrants, and aliens but also in an inability to value the ordinary, unruled multicultural that has evolved organically and unnoticed in urban centers. Drawing on seminal discussions of race by Frantz Fanon, W. E. B. DuBois, and George Orwell, Gilroy goes beyond the idea of mere tolerance and proposes that it is possible to celebrate multicultural and live with otherness without becoming anxious, fearful, or violent.

Moral Issues in Global Perspective - Volume 2: Human Diversity and Equality - Second Edition Christine Koggel 2006-03-27 Now available in three thematic volumes, the second edition of *Moral Issues in Global Perspective* is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values, while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of *Moral Issues in Global Perspective* incorporates work by race, class, feminist, and disability theorists. *Human Diversity and Equality*, the second of the three volumes, examines issues of equality and difference and the effects, within and across borders, of kinds of discrimination on the basis of race, ethnicity, gender, disability, class, and sexual orientation. Nine essays are new, four of which were written especially for this volume. *Moral Issues in Global Perspective* is available in three separate volumes—*Moral and Political Theory*, *Human Diversity and Equality*, and *Moral Issues*. Traveling Black Mia Bay 2021-03-23 A riveting, character-rich account of racial segregation in America that reveals just how central travel restrictions were to the creation of Jim Crow laws—and why “traveling Black” has been at the heart of the quest for racial justice ever since. Why have white supremacists and civil rights activists been so focused on Black mobility? From Plessy v. Ferguson to #DrivingWhileBlack, African Americans have fought for over a century to move freely around the United States. Curious as to why so many cases contesting the doctrine of “separate but equal” involved trains and buses, Mia Bay went back to the sources with some basic questions: How did travel segregation begin? Why were so many of those who challenged it in court women? How did it move from one form of transport to another, and what was it like to be caught up in this web of contradictory rules? From stagecoaches, steamships, and trains to buses, cars, and planes, *Traveling Black* explores when, how, and why racial restrictions took shape and brilliantly portrays what it was like to live with them. “There is not in the world a more disgraceful denial of human brotherhood than the ‘Jim Crow’ car of the southern United States,” W. E. B. Du Bois famously declared. Bay unearth’s troves of supporting evidence, rescuing forgotten stories of undaunted passengers who made it back home despite being insulted, stranded, re-routed, and ignored. Black travelers never stopped challenging these humiliations and insisting on justice in the courts. *Traveling Black* upends our understanding of Black resistance, documenting a sustained fight that falls outside the traditional boundaries of the Civil Rights Movement. A masterpiece of scholarly and human insight, this book helps explain why the long, unfinished journey to racial equality so often takes place on the road.

Political Languages of Race and the Politics of Exclusion Andy R. Brown 2018-08-16 First published in 1999, *Political Languages of Race and the Politics of Exclusion* examines the post-race signification logic of languages used to promote and achieve the exclusion and stigmatisation of migrant groups within post-war Britain. Re-examining the time of Smethwick and Powellism, as well as extensive Parliamentary debates, this book develops an original thesis to show how backbench racism became legitimated as frontbench commons’ sense. The book argues that the achievement of the success of post-war Parliamentary racism has been made possible by the development of a ubiquitously anecdotal narrative of the travails of the ‘Forgotten Englishman’ awoken to a multi-cultural nightmare in Britain’s decaying inner cities. While the concept of ‘race’ has remained under erasure, the logic of post-race signification discourse has allowed the re-making of racism in public Britain.

Race Ryland Fisher 2007 The author interviews some South Africans of different hues, about the idea of race, what it has meant to them and how they envision a future South Africa, steeped as the country and its people are in a highly charged and often unacknowledged world of racial sensitivity. Amongst the interviewees are Naledi Pandor, Minister of Education; Wilmot James, executive director of the African Genome Education Institute; Rhoda Kadalie, journalist and human rights activist; Melanie Verwoerd, former South African ambassador to Ireland; Phatekile Holomisa, president of the Congress of Traditional Leaders of South Africa (Contralesa); and Carel Boshoff, the founder of Orania, an Afrikaner homeland established in 1991 in the Northern Cape.

When Colorblindness Isn’t the Answer Anthony B. Pinn 2017-05-15 The future of the United States rests in many ways on how the ongoing challenge of racial injustice in the country is addressed. Yet, humanists remain divided over what if any agenda should guide humanist thought and action toward questions of race. In this volume, Anthony B. Pinn makes a clear case for why humanism should embrace racial justice as part of its commitment to the well-being of life in general and human flourishing in particular. As a first step, humanists should stop asking why so many racial minorities remain committed to religious traditions that have destroyed lives, perverted justice, and justified racial discrimination. Rather, Pinn argues, humanists must first confront a more pertinent and pressing question: why has humanism failed to provide a more compelling alternative to theism for so many minority groups? For only with a bit of humility and perspective—and a recognition of the various ways in which we each contribute to racial injustice—can we truly fight for justice.

Christological Anthropology in Historical Perspective Marc Cortez 2016-02-02 What does it mean to be “truly human?” In *Christological Anthropology in Historical Perspective*, Marc Cortez looks at the ways several key theologians—Gregory of Nyssa, Julian of Norwich, Martin Luther, Friedrich Schleiermacher, Karl Barth, John Zizioulas, and James Cone—have used Christology to inform their understanding of the human person. Based on this historical study, he concludes with a constructive proposal for how Christology and anthropology should work together to inform our view of what it means to be human. Many theologians begin their discussion of the human person by claiming that in some way Jesus Christ reveals what it means to be “truly human,” but this often has little impact in the material presentation of their anthropology. Although modern theologians often fail to reflect robustly on the relationship between Christology and anthropology, this was not the case throughout church history. In this book, examine seven key theologians and discover their important contributions to theological anthropology.

The Negro W. E. B. Du Bois 2014-11-24 Africa is at once the most romantic and the most tragic of continents. So begins *The Negro*, the first comprehensive history of African and African-derived people, from their early cultures through the period of the slave trade and into the twentieth century. Originally published in 1915, the book was acclaimed in its time, widely read, and deeply influential in both the white and black communities, yet this beautifully written history is virtually unknown today. As a wellspring of critical studies of Africa and African Americans, it directly and indirectly influenced and inspired the works of scholars such as C. L. R. James, Eric Williams, Herbert Aptheker, Eric Foner, Kwame Anthony Appiah, and Henry Louis Gates, Jr. One of the most important books on Africa ever written, it remains fresh, dynamic, and insightful to this day. *The Negro* is compelling on many levels. By comparing W. E. B. Du Bois’s analysis with subsequent scholarship, Robert Gregg demonstrates in his afterword that *The Negro* was well ahead of its time: Du Bois’s view of slavery prefigures both paternalistic perspectives and the materialist view that the system was part of the capitalist mode of production. On black contributions to the Civil War and to the emancipation of slaves, historians have yet to acknowledge all that Du Bois delineated. In his discussion of Reconstruction, Du Bois preempts much later historiography. His identification of segregation as an issue of class rather than race is almost ~~four years ahead of the New York Public Library~~ ~~in the current work~~ and historically prescient, Du Bois assumed globalization as a matter of course, so that his definition of the color line in *The Negro* links all colonized ~~from descent west to the~~ ~~from~~ African descent. With the resolution of the Cold War and the ascendancy of the global market, Du Bois’s sweeping vision of Africans and the diaspora seems more relevant now than at any time in the past hundred years.

Utz McKnight 2013-07-04 The traditional assumption today about race is that it is not political; that it has no political content and is a matter of individual beliefs and attitudes. In *Race and the Politics of the Exception*, Utz McKnight argues that race is in fact political and defines how it functions as a politics in the United States. McKnight organizes his book into three sections, beginning with a theoretical section about racial politics in the United States. Using theorists such as Benjamin, Agamben, and Schmitt, McKnight discusses how the idea of racial communities went from being constituted through the idea of racial sovereignty and a politics of the exception that defined blacks as the internal enemy, to being constitutionally defined through the institutions of racial equal opportunity. In the second section, McKnight further develops his critical race theory by exploring in more detail the social use of race today. The election of President Obama has brought the politics of racial equality to a critical point. In spite of a very powerful set of political tools to define it as a thing of the past, race matters. In the final section, McKnight engages with important African American fiction from each of the three major periods of racial politics in the U.S. Earlier descriptions of political theory are used throughout these analyses to refine the argument for a new critical politics of race. Scholars of political theory, identity politics, African American studies, and American studies will find this work ground-breaking and relevant.
