cycle. This means that we also look at rain-fed agriculture production, soil and water conservation within the watershed, rainwater harvesting techniques etc. To facilitate the comprehensive thinking in terms of the entire water cycle, three types of water can be distinguished, together forming the 'rainbow' of water (van der Zaag 2000).

[The Rainbow Passage - University of York](#)

the rainbow was caused by reflection of the sun's rays by the rain. Since then physicists have found that it is not reflection, but refraction by the raindrops which causes the rainbows. Many complicated ideas about the rainbow have been formed. The difference in the rainbow depends considerably upon the size of the drops, and
