[How I Unblocked 5 Arteries](#) Wong Kam Luen 2015-03-08 "On 28th of February 2013, I was lying naked in the operating room at Mount Elizabeth hospital in Singapore. My cardiologist, Dr Ann Chan, was giving me an Angiogram. She discovered that five of my arteries were blocked. One was completely blocked while four others were at least 90% blocked. When she told me what she found, my heart sank. My whole world went upside down The solution to my arterial blockages was a bypass operation. It was very invasive. It was a mechanical solution to my biological problem. A heart bypass solution would only give me temporary relieve but would not stop the arteries from becoming completely blocked and eventually for me to die. I was looking for a solution that would reverse my blockages. I found it! I combined the research findings of Dr Ignarro(LArginine), Dr Dean Ornish and Dr Caldwell B Esselstyn Jr(reversing heart Diseases) and came out with a program that could clear my blockages. After a year of following my program, my angiogram results showed that my blockages were reduced by about 20%. I could walk 7 km/day whereas before I could not manage 100 meters without severe pain in my chest. My blood pressure was lowered to 120/75/65 averagely and cholesterol level about 150 mg/Dl without medication. The solution was really quite simple. There are three important components in my program:(1) L Arginine,(2) oil and cholesterol free diet and (3)exercise. The detail dosages for the supplements are in the book. Basically, if we take the correct food, the body will heal itself. In other words Since the suggested food items are not drugs, they can be taken by the patients with their medication. However over time, those drugs can be reduced or done away with completely like If you are already suffering from heart diseases, strokes and Peripheral Arterial Disease(PAD), this book will definitely help. It would also help those people who have high blood pressure and high cholesterol levels. All the above diseases arise from blockages of the arteries in the brain, heart or

leg. The unblocking processes are the same. If you follow the recommended way as detailed in the book, the unblocking of the arteries will occur. Dr Yu and his Cardiologist wife, Dr Wang Cuixia, explained in great detail the causes of the atherosclerosis(plaque forming) which resulted in heart diseases, strokes or Peripheral Arterial Diseases. He also delved into the details of the research on the trials for L Arginine and the different levels of LDLP, HDLP and lipids in the reversing process of atherosclerosis. In short, the programs listed in the book can and will reduce the plaque in the arteries. Julie, my wife, made the food that I consume daily which actually help clear my blockages. She wrote the recipes for the food that she fed me with. The book had all the above which together helped to clear my arterial blockages.

Positive Mind, Healthy Heart Joseph C. Piscatella 2010-01-28 Here's the problem: 17 million Americans suffer from heart disease, and every year 1 million of them will be just lucky enough to survive a heart attack. They know they must change their lives—their diet, their stress, the amount of exercise they do. And not for a few months, but forever. Most don't do it. What they need, as much as low-fat recipes and fitness plans, is daily motivation—a reassuring yet no-nonsense guide to staying the course to heart health. Here's the solution: From Joseph C. Piscatella, one of the longest-surviving bypass patients in the U.S.—31 years and counting—comes a supportive, generous, think-positive book that shares the secret of his extraordinary success. This is the stuff that kept Joe going—a year-long selection of motivational stories, inspirations, quotes, wisdom, meditations, tips, and more. When it's 5:00 A.M. and raining outside and you're tempted to skip that morning jog, remember "runner" Bob Ireland, a Vietnam vet who lost both legs in the war yet finished the New York marathon using only his arms, the first person ever to do so. Think little things don't make a difference? Take a lesson from golf: An average of less than 1.5 strokes per round in the 2002 season made a \$5.6 million difference in earnings between #1 golfer (Tiger Woods) and #10 golfer (Sergio Ggarcia). And why a book of everyday entries? "People often say that motivation doesn't last. Well, neither does bathing—that's why we recommend it daily."—Zig Ziglar.

The Food Cure: Eat Your Way to Good Health Christine & Sonny Gray 2018-02-04 Poor health is America's #1 problem. Over 70% of us are either overweight or obese. Over 70% of Americans are on at least one prescription medication, and more than half take two. Preventable chronic diseases are responsible for the overwhelming majority of deaths in this country. Just two of these chronic illnesses—heart disease and cancer—together account for nearly half of all deaths in the U.S., needlessly taking the lives of 1.2 million loved ones each year. Currently, 94% of the calories being consumed by Americans come from meat, dairy products and processed foods with only 6% of calories coming from healthy fresh vegetables, fruits, beans/legumes, and whole grains, according to the USDA's Profiling Food Consumption in America. The Standard American Diet full of fat and sugar (meats and sweets) is depriving us of real nutrients that our bodies require for good health. In this eye-opening book, the authors reveal the causes of our chronic diseases and the foods that can make us well.
