This fifth installment of the Jeff
Greenaway novella series finds
our eleven-year-old hero
shipped off from Manhattan for
the summer (as usual) to Camp

Timahoe, near the town of Lost Indian, Vermont, in the summer of 1963. All seems normal at first with Ahab the Arab playing all over the radio. But the camp seems to be mysteriously going to pieces. Reflections on Architecture, Society and Politics Graham Cairns 2016-10-04 Reflections on Architecture, Society and Politics brings together a series of thirteen interview-articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the

social sciences, including Noam Chomsky, Peggy Deamer, Robert A.M. Stern, Daniel Libeskind and Kenneth Frampton. Each chapter explores the relationship between architecture and socio-political issues through discussion of architectural theories and projects, citing specific issues and themes that have led to, and will shape, the various aspects of the current and future built environment. Ranging from Chomsky's examination of the US-Mexico border as the architecture of oppression to Robert A.M. Stern's defence of projects for the Disney corporation and George W. Bush, this book

places politics at the center of issues within contemporary architecture.

Post-Petroleum Design George Elvin 2015-05-15 Despite the growing demand for design strategies to reduce our petroleum use, no one has yet brought together the lessons of the world's leading post-petroleum designers into a single resource. **Post-Petroleum Design** brings them together for the first time. Readers will be introduced to the most current, innovative, plastic-and petroleum-free products and projects in industrial design, architecture, transportation, electronics, apparel and more. **Post-Petroleum Design** explores

firsthand the client and consumer motivations behind the demand, and shares the case studies, principles, best practices, risks and opportunities of the world's leading post-petroleum design experts who are already meeting that demand. It introduces 40 inspiring individuals from across the globe; people like Eben Bayer, the American innovator whose company, Ecovative, is growing houses from mushrooms; Mohammed Bah Abba, whose Zeer Pot is helping families keep produce fresh in the sweltering Nigerian summer without electricity; and the engineers at Mercedes-Benz

Advanced Design Studios whose Biome car evolves from genetically engineered DNA. Post-Petroleum Design gives design professionals the information they need to research, evaluate, and select materials, technologies and design strategies that meet the growing demand for sustainable design, plastic-free materials and process energy conservation. Designer profiles, studies, statistics and many colour illustrations all highlight the work—some of the best design work to be found anywhere, and showcased here for the first time.

The WASP Question Andrew Fraser 2011 Fraser offers a

groundbreaking contribution to the project of synthesizing Anglo-American constitutional and legal history with the evolutionary biology of ethnicity and a Christian ethno-theology. "The WASP Question" is valuable for focusing attention on the plight of Anglo-Saxon societies assailed by runaway materialism and imposed diversity.

Green Planets Gerry Canavan 2014-04-15 Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction, and oil

shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology, and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem, and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville, and Paolo Bacigalupi—as well as recent blockbuster films like *Avatar* and *District 9*—the essays in *Green Planets* consider the

important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of “ecological SF” and related works of fiction, nonfiction, films, television, comics, children’s cartoons, anime, video games, music, and more. Contributors include Christina Alt, Brent Bellamy, Sabine Höhler, Adeline Johns-Putra, Melody Jue, Rob Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman.

The Harrows of Spring James Howard Kunstler 2016-07-05
The World Made by Hand postapocalyptic saga concludes with this “suspenseful tale spiked with suffering and violence, rough justice and love” (Booklist). The small town of Union Grove has adapted, struggled, and thrived in the new age of civilization. But early spring is full of hardships: Fresh food is scarce and the winter stores are almost gone. Despite the time of privation, young explorer Daniel Earle resurrects the town newspaper, and the town trustees ask him to help revive the Hudson River trade route. But even as the townsfolk strive forward, a group of

visitors remind them that nothing is easy in the new world. They proclaim themselves as representatives of the Berkshire People’s Republic, spouting high-minded, near-fanatical rhetoric of social justice and absolute equality—all while demanding tribute from the citizens under slyly veiled threats. Now, the townspeople of Union Grove will have to decide just how far they are willing to go to keep the freedom and peace for which they have fought so hard . . . With this glimpse into a future that could become reality all too soon, James Howard Kunstler delivers “a slyly folksy, caustically hilarious,

unabashedly proselytizing, and affecting finale in a keenly provocative saga.” (Booklist).
Peak Oil Matthew Schneider-Mayerson 2015-10-14 The concept of 'peak oil' - the moment when global oil production peaks and a train of economic, social and political catastrophes accompany its subsequent decline - has captured the imagination of a large number of Americans and created a quiet, yet intense underground movement. This book delves deep inside the world of 'peakists', showing how their hopes and fears about the postcarbon future led them to prepare for the social breakdown they foresee. By

exploring their worldview, and the unexpected way that these fears transformed many members of this left-leaning group into survivalists, it builds a larger analysis of the rise of libertarianism, the role of oil in modern life, the political impact of digital technologies, racial and gender dynamics of post-apocalyptic fantasies and the social organisation of environmental denial.

The Flight of Mehetabel James Howard Kunstler 2013-05-01 From WATER STREET PRESS President Kennedy is entertaining some now-forgotten head-of-state in the White House and eleven-year-old Jeff Greenaway and his best friend

Bobby Schindler are in New York City entertaining themselves-tossing water balloons, pennies and one Spanish melon off the fifteenth-floor terrace of the Schindler's apartment building over looking Fifth Avenue. Bobby's cat, Mehetabel, wanders out to sun herself and-inspired by the blustery day-the boys decide to fashion a parachute of Mrs. Schindler's pink damask tablecloth and send Mehetabel for a twelve-foot sail from the balcony of the water tower to the terrace. The phlegmatic Mehetabel cooperates like a flight cadet as they fit her with the parachute, but the wind is unpredictable and the

experiment goes awry. Mehetabel takes flight over Central Park with the boys-along with a Park Avenue matron, a couple of winos, a retired veterinarian and the New York City Fire Department-in hot pursuit. James Howard Kunstler's charming tale takes us back to an age when NYC was a natural playground for two little boys on a breezy afternoon, a native would lend you a dime to make a phone call, and cats could fly. The Flight of Mehetabel is the third in Mr. Kunstler's series of children's books for adults. Collect all of his enchanting Jeff Greenaway tales at www.waterstreetpressbooks.co

The Fiction Lover's Companion

James Howard Kunstler

2012-03-15 Two days before

Christmas, eons ago in 1962, eleven-year-old Jeff Greenaway overhears his parents having an argument in their New York City apartment. Could it be, as his mother declares sarcastically, that he was "an orphan found on the doorstep in a willow basket?" And are these people who claim to be his mother and father actually imposters? The heartbreaking news propels Jeff into a strange adventure on the verge of the Great Holiday. He sets off for Grand Central Station to find the town of Drakesburg, Vermont, inspired

by an episode of his favorite TV show, The Twilight Zone--the show that happened to be on when his parents started their quarrel. In Drakesburg, he imagines, with its quaint turn-of-the-century charm and its people full of tender-hearted goodness, he can start life over as an orphan, maybe even find a sympathetic family to adopt him if he promises to milk the cow and take out the garbage. Jeff rides the Holiday Special train north through the night to Vermont, with his baseball mitt and some fresh underwear in his school briefcase, only to discover that the sparkly New England town of television land is not quite the paradise he

imagined. The locals in the town diner have never seen anything quite like him, a boy on the run from parents he says were phonies. Jeff makes the rounds of the town's best-looking houses desperately seeking a family that might be interested in adopting an orphan. The results are not quite what he expected. But as twilight settles over the snowy streets on Christmas Eve, fate lands him in the perfect situation, a family with a boy his own age, who even has his own horse! The only complication is that the father is the town sheriff.... James Howard

Kunstler's charming, elegiac tale returns us to a time when we all

believed we would shape life on our own terms--and reminds us that happiness is still something worth taking a few risks to achieve.

Life Rules Ellen LaConte

2010-10-01 LaConte's book

offers a compelling answer To

The now-universal question

suggested by her subtitle. The

global economy has gone viral.

it is ravaging Earth's equivalent

of an immune system the way

HIV ravages the human

immune system, triggering a

Critical Mass of AIDS-like

mutually reinforcing

environmental, economic, social

and political crises that are

undermining the ability of

human and natural communities

to support, protect and heal themselves. LaConte's prognosis? Since Life rules, we don't, Life will last but Life as we know it-and a lot of us-won't. LaConte shows that Life learned two billion years ago how to deal with pathological economies: it put them out of business. it encoded in other-than-human species a set of Economic Rules for Survival that allow them to live within Earth's means long term. In accessible prose LaConte explains how those rules can work for humans too. Recommended as a tool for community transition and cultural transformation, Life Rules offers a solution to our

global crisis the publishers call "authentically conservative, deeply Green, and profoundly liberating."

World Made by Hand James

Howard Kunstler 2009-01-19 In

this "richly imagined" dystopian vision, mankind must find a way to survive as modern civilization slowly comes apart (O, The Oprah Magazine). When Earth ran dry of oil, the age of the automobile came to an end; electricity flickered out. With deprivation came desperation—and desperation drove humanity backward to a state of existence few could have imagined. In the tiny hamlet of Union Grove, New York, every day is a struggle.

For Mayor Robert Earle, it is a battle to keep the citizens united. As the bonds of civilization are torn apart by war, famine, and violence, there are some who aim to carve out a new society: one in which might makes right—a world of tyranny, subjugation, and death. A world Earle must fight against . . . In his shocking nonfiction work, *The Long Emergency*, social commentator James Howard Kunstler explored the reality of what would happen if the engines stopped running. In *World Made by Hand*, he offers a stark glimpse of that future in a work of speculative fiction that stands as “an impassioned and invigorating tale whose ultimate

message is one of hope, not despair” (San Francisco Chronicle). “Brilliant.” —Alan Cheuse, Chicago Tribune “It frightens without being ridiculously nightmarish, it cautions without being too judgmental, and it offers glimmers of hope we don’t have to read between the lines to comprehend.” —Baltimore City Paper

Geography Of Nowhere James

Argues that much of what surrounds Americans is depressing, ugly, and unhealthy; and traces America's evolution from a land of village commons to a man-made landscape that ignores nature

and human needs.

Apocalypse and Post-politics

Mary Manjikian 2012 In Mary Manjikian's *Apocalypse and Post-Politics: The Romance of the End*, apocalypse-themed novels of contemporary America and historic Britain are affirmed as a creative luxury of development. Manjikian examines a number of such novels using the lens of an international relations theorist, identifying faults in the logic of the American exceptionalists and showing that the apocalyptic narrative provides both a counterpoint and a corrective to the narrative of exceptionalism."

Existential Threats Lisa Vox

2017-07-03 In this book the author assembles a wide range of media—science fiction movies, biblical tractates, rapture fiction—to develop a critical history of the apocalyptic imagination from the late 1800s to the present.--Publisher's description.

A History of the Future James

Howard Kunstler 2014-08-05

Humanity hangs on after the fall of civilization in this “wily, funny, rip-roaring, and profoundly provocative page-turner” (Booklist, starred review). After the collapse of the old world—the pandemics, the environmental disasters, the end of oil, the ensuing chaos—people are pursuing a

simpler and sometimes happier existence. In Union Grove, New York, the townspeople are preparing for Christmas . . . the perfect time for a long-lost member of the community to return. Robert Earle's son, Daniel, has come home after two years exploring what is left of the United States. He brings news of three new nations arisen from what was once America—and the dangers and possibilities they may hold. Meanwhile, a horrific murder threatens to turn the community of Union Grove against itself—and what is supposed to be a time of peace and togetherness is overtaken by suspicion and fear. In this

vividly depicted look at a world that may be on our own horizon, “Kunstler skewers everything from kitsch to greed, prejudice, bloodshed, and brainwashing” in a gripping story of hope, hate, and humanity's last chance at survival (Booklist).

Big Slide James Kunstler
2018-04-05 "Big Slide" is a three-act stage play. In a moment of unprecedented national political upheaval, members of the large Freeman family flee New York and Boston and take refuge in their Adirondack mountain mansion, called Big Slide. The electricity is down, and the Internet with it. Cities have been bombed and

trouble has even come to these mountains, where extremist self-styled "regulators" are hunting down the rich and privileged. Big Slide is old-school, rousing, heart-pounding theater.

De aarde blijft altijd bestaan

George Stewart 2018-01-17 In 'De aarde blijft altijd bestaan' van George R. Stewart baant een besmettelijke ziekte van nooit eerder vertoonde proporties zich een weg over de aarde. Dit is het verhaal van een van de weinige overlevenden, Isherwood 'Ish' Williams, een intellectuele einzelgänger die zich al verzoend heeft met de grimmige plicht de ondergang

van de mensheid te moeten aanschouwen, tot hij de wijze en dappere Em ontmoet. Samen trotseren ze onvoorstelbare uitdagingen om de zaden voor een nieuw begin te planten. George R. Stewart (1895-1980) was een Amerikaanse historicus en schrijver. 'De aarde blijft altijd bestaan' was zijn enige sciencefictionroman. Het boek was na publicatie in 1949 een 'instant classic'. In 1951 won Stewart er de eerste International Fantasy Award voor.

Environmentalism in the Realm of Science Fiction and Fantasy Literature Chris Baratta
2011-11-15 The collection of

essays titled Environmentalism in the Realm of Science Fiction and Fantasy Literature discusses the environmental and ecocritical themes found in works of science-fiction and fantasy literature. It focuses on an analysis of important literary works in these genres to yield an understanding of how they address the environmental issues we are facing today. Organized into four sections titled “Industrial Dilemmas,” “The Natural World, Community, and the Self,” “Materialism, Capitalism, and Environmentalism,” and “Dystopian Futures,” the essays included also investigate the solutions that these works

present to ensure the sustainability of our natural world and, in turn, the sustainability of humanity. This collection will appeal to a broad range of scholars, including those who focus their studies on one of, or all of, the following fields: Ecocriticism, Science Fiction and Fantasy Literature, and Environmentalism in Literature. The essays investigate the myriad ways that science fiction and fantasy literature address environmental concerns, with a focus on the detrimental effects – on humanity, on society – of environmental destruction. With topics ranging from the dangers of industrial progress to the

connection between environmental degradation and the destruction of the individual, to environmental dangers posed by capitalistic societies to ignored warnings of ecological crises, the essays each tactfully analyze the relationship between the environmental themes in literature and how readers and scholars can learn from the irresponsible treatment of the environment, while also considering solutions to this crisis that are found in science fiction and fantasy literature.

Is the End of the World Near?

Ron Miller 2011-10-01 At one time or another, just about everyone has talked about the end of the world. But what does

this phrase really mean? Does it mean the end of the human race? The end of planet Earth? The end of our Sun and solar system? And if the world were to actually end, how and when would it happen? People have been asking these questions for thousands of years. Many religious prophets have predicted the end of the world. Science-fiction writers have created lots of end-of-the-world stories. Scientists, too, talk about natural events that could destroy human life or planet Earth. Some end-of-the-world events are dramatic. Imagine an asteroid slamming into Earth, creating a massive explosion. Other scenarios don't involve a

single, catastrophic event. For example, global warming is changing the planet and threatening people, plants, and animals. It might not bring about the end of the world, but it might change life as we know it. In this book, we'll look at these scenarios and many more—everything from Mayan prophecy to nuclear disaster to the end of the universe. We'll find out which scenarios to ignore and which ones to really worry about.

Fuel
Heidi C. M. Scott
2018-07-12
Fuel: An Ecocritical History is the first book to chart our changing attitudes to fuel and energy through the literature and culture of the

modern era, focusing on the 18th-century to the present. Reading a wide range of writers from Blake, Austen and Dickens to Upton Sinclair and Edward Abbey, Heidi Scott explores how our move from a pre-industrial reliance on biomass and elemental energy sources to our current dependence on the fossil fuels of coal, oil and natural gas have fundamentally shaped human identity and culture. The book's Anthropocene perspective reshapes our view of energy history and climate change, and Fuel looks forward to ways in which we can reimagine our culture away from the fossil fuel paradigm towards a more

sustainable energy future driven by renewable, elemental energy.

Living Oil Stephanie LeMenager 2014 Drawing on novels, film, and photographs, Living Oil offers a literary and cultural history of modern environmentalism and petroleum in America.

The Witch of Hebron James

Howard Kunstler 2010-09-07

The dystopian epic of World

Made by Hand continues in a

novel hailed as “Larry

McMurty’s Lonesome Dove, set

in the dystopian world of *The Road*” (New York Journal of Books). A new age has begun on Earth. Oil is no longer a resource. Some parts of America are nuclear wastelands. Civilization has devolved into a constant struggle for food, water, and shelter. In the tiny hamlet of Union Grove, New York, the US government is little more than a rumor. Wars are being fought over dwindling resources and illness is a constant presence. Bandits roam the countryside, preying on the weak and a sinister cult threatens the town’s fragile stability. It is up to every citizen of Union Grove to decide what they are willing to fight for,

kill for, and die for . . . This is a tale of humanity at its shining best and brutal worst woven together in a “suspenseful, darkly amusing story with touches of the fantastic in the mode of Washington Irving” (Booklist). “Kunstler’s postapocalyptic world is neither a merciless nightmare nor a starry-eyed return to some pastoral faux utopia; it’s a hard existence dotted with adventure, revenge, mysticism, and those same human emotions that existed before the power went out.” —Publishers Weekly

Environmental Crime and Social Conflict Avi Brisman 2016-03-09

This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific

species and ecosystems.

Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world.

With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice.

American Literature in Transition, 2000–2010
Rachel Greenwald Smith
2017-12-28 American Literature in Transition, 2000–2010 illuminates the dynamic transformations that occurred in American literary culture during the first decade of the twenty-first century. The volume is the first major critical collection to address the literature of the 2000s, a decade that saw dramatic changes in digital technology, economics, world affairs, and environmental awareness. Beginning with an introduction that takes stock of the period's major historical, cultural, and literary movements, the volume

features accessible essays on a wide range of topics, including genre fiction, the treatment of social networking in literature, climate change fiction, the ascendancy of Amazon and online booksellers, 9/11 literature, finance and literature, and the rise of prestige television. Mapping the literary culture of a decade of promise and threat, *American Literature in Transition, 2000–2010* provides an invaluable resource on twenty-first century American literature for general readers, students, and scholars alike. *Sacred Demise* Ph. D. Carolyn Baker 2009 The collapse of industrial civilization is rapidly unfolding and offers us an

opportunity far beyond mere survival, even as it renders absurd any attempts to "fix" or prevent the end of the world as we have known it. Sacred Demise is about the transformation of human consciousness and the emergence of a new paradigm as a result discovering our purpose in the collapse process, thereby coming home to our ultimate place in the universe. Our willingness to consciously embark on the journey with openness and uncertainty may be advantageous for engendering a quantum evolutionary leap for our species and for the earth community. "Carolyn Baker is

tireless in her quest to understand and speak about the collapse of civilization. Her message is simple: our journey through collapse will be as much a spiritual one as a physical one, a journey back from profound disconnection to the sacred. And so our emotional, psychological and spiritual preparations will be as important as the gardens we plant, the healing skills we acquire, and the actions we take in defense of the community of life. A book of tools and exercises to help with that preparation, then, is a welcome and much-needed addition to the literature of collapse."--Tim Bennett and

Sally Erickson, Writer and Producer of the documentary "What A Way To Go: Life At the End of Empire" "Carolyn speaks with a confidence that never flinches from entering into the hardest truths of our times, or from the most difficult truths about the culture we are immersed in, so that we might emerge from the chrysalis of global crisis with open hearts and a renewed way of living on Earth together."--Juan Santos, Fourth World Blogspot

The Rise, Fall, and Redemption of Mooski Toffski Offski James Howard Kunstler 2013-10-15 A children's book for grown-ups. Eleven-year-old Jeff Greenaway, budding Cold War

comedian, connoisseur of Sabrett hot dogs, and scholar of horror movies, has a new obsession: classmate Wendy Waldbaum. So far, except for one wildly ill-timed declaration of love, Jeff has adored her from afar-and fervently believes that the only thing standing in the way of winning Wendy's heart is his tall, rich, and dumb rival, classmate Lee Talbot. The idea that Wendy would want anything to do with a stuck-up jerk like Talbot infuriates Jeff. And when he runs into Wendy weeping in the Mummy's Tomb at the Met, and decides the loathsome Talbot is responsible for her tears, Jeff moved to revenge. And what an act of

vengeance! Fifteen seconds of
payback that would live in Jeff's
memory as an eternity. Only
belatedly, after finding out his
heroics are going to result in his
being sent away to a private
boarding school, where life is
hard, does Jeff find out the real
reason for Wendy's sadness.
James Howard Kunstler's
charming tale takes us back to

hearts were broken-and
reminds us that maybe, just
maybe, love still really does
conquer all.

An Extraordinary Year of

Ordinary Days Susan Wittig

Albert 2010-06-04 From Eudora

Welty's memoir of childhood to

May Sarton's reflections on her

seventieth year, writers' journals

offer an irresistible opportunity

to join a creative thinker in

musings on the events—whether

in daily life or on a global

scale—that shape our lives. In

An Extraordinary Year of

Ordinary Days, best-selling

mystery novelist Susan Wittig

Albert invites us to revisit one of

the most tumultuous years in

recent memory, 2008, through

the lens of 365 ordinary days in

which her reading, writing, and

thinking about issues in the

wider world—from wars and economic recession to climate change—caused her to reconsider and reshape daily practices in her personal life. Albert's journal provides an engaging account of how the business of being a successful working writer blends with her rural life in the Texas Hill Country and the Sangre de Cristo Mountains of New Mexico. As her eclectic daily reading ranges across topics from economics, food production, and oil and energy policy to poetry, place, and the writing life, Albert becomes increasingly concerned about the natural world and the threats facing it, especially

climate change and resource depletion. Asking herself, "What does it mean? And what ought I do about it?", she determines practical steps to take, such as growing more food in her garden, and also helps us as readers make sense of these issues and consider what our own responses might be.

Ik wil je vertellen over de moord op mijn vader. Willem Storm en zijn zoon behoren tot de weinige overlevenden in Zuid-Afrika – en de rest van de wereld – van een allesverwoestend virus. Willem

wil hun leven weer opbouwen bij de stuwdam bij Vanderkloof, vanwege de beschutte ligging en de mogelijkheid om elektriciteit op te wekken. Alleen is Vanderkloof niet helemaal verlaten. Een groepje uitschot gebruikt het plaatsje als uitvalsbasis, en houdt een vrouw gevangen. Ze hadden door kunnen rijden, maar zo zit Willem niet in elkaar. Wanneer het tot een schietpartij komt, blijkt niet Willem, maar de dertienjarige Nico het koelbloedigst. Als Nico jaren later zijn memoires schrijft en terugkijkt op zijn leven, lezen we over de momenten waarop zijn hart werd gebroken, zijn loyaliteiten op de proef werden

gesteld, en over zijn pijnlijkste herinnering: de moord op zijn vader.

Manhattan Gothic James

Howard Kunstler 2012-09-01

From WATER STREET PRESS

A children's story for grown-ups.

.."amongst their own kind,

children are the world's most

thoroughgoing skeptics." But not

eleven-year-old Jeff

Greenaway. When his parents

suddenly come into possession

of hard-to-get tickets to the

smash musical How To

Succeed in Business Without

Really Trying, but can't find a

babysitter, Jeff ventures out in

the Manhattan night to meet his

hero, Count Zackuloff, the mad,

moldy host of Channel 5's

Midnight Mystery Theater, a horror movie program. Amazingly, the Count takes Jeff along on a publicity stunt in costume to the Horn and Hardart Automat, drawing crowds of curious fans. Next, the Count takes Jeff to a double feature horror matinee at the 58th Street Translux. An unusual friendship develops between the boy and the ghoul. Through it all, Jeff nurtures dreams of becoming the Count's on-screen sidekick. But the Count has his own dreams—and they do not include a lifetime of introducing old horror movies on a third-rate New York TV station. James Howard Kunstler's charming tale takes

us back to an age when New York City was a natural playground for a little boy and his own, personal vampire hero—a time when it seemed possible that all of our dreams could come true.

The Art of Classic Planning Nir Haim Buras 2020-01-28 "An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around

the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years—not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be

regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of L'Enfant's Washington, Haussmann's Paris, and Burnham's Chicago,

Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities."

Too Much Magic James Howard Kunstler 2013-07-09 The author of The Long Emergency offers his predictions as to what technological advances will truly bring, in a sobering look at the future that dispels the overly optimistic vision of the future as depicted in 1950s pop culture.

Living in the Long Emergency

James Howard Kunstler
2020-03-03 Forget the

speculation of pundits and media personalities. For anyone asking "Now what?" the answer is out there. You just have to know where to look. In his 2005 book, The Long Emergency, James Howard Kunstler described the global predicaments that would pitch the USA into political and economic turmoil in the 21st century—the end of affordable oil, climate irregularities, and flagging economic growth, to name a few. Now, he returns with a book that takes an up-close-and-personal approach to how real people are living now—surviving The Long Emergency as it happens. Through his popular blog,

Clusterf*ck Nation, Kunstler has had the opportunity to connect with people from across the country. They've shared their stories with him—sometimes over years of correspondence—and in *Living in the Long Emergency: Global Crisis, the Failure of the Futurists, and the Early Adapters Who Are Showing Us the Way Forward*, he shares them with us, offering an eye-opening and unprecedented look at what's really going on "out there" in the US—and beyond. Kunstler also delves deep into his past predictions, comparing and contrasting them with the way things have unfolded with unflinching

honesty. Further, he turns an eye to what's ahead, laying out the strategies that will help all of us as we navigate this new world. With personal accounts from a Vermont baker, homesteaders, a building contractor in the Baltimore ghetto, a white nationalist, and many more, *Living in the Long Emergency* is a unique and timely exploration of how the lives of everyday Americans are being transformed, for better and for worse, and what these stories tell us both about the future and about human perseverance.

Memory Unbound Lucy Bond

2016-11-01 Though still a relatively young field, memory

studies has undergone significant transformations since it first coalesced as an area of inquiry. Increasingly, scholars understand memory to be a fluid, dynamic, unbound phenomenon—a process rather than a reified object. Embodying just such an elastic approach, this state-of-the-field collection systematically explores the transcultural, transgenerational, transmedial, and transdisciplinary dimensions of memory—four key dynamics that have sometimes been studied in isolation but never in such an integrated manner. Memory Unbound places leading researchers in conversation with emerging voices in the field to

recast our understanding of memory’s distinctive variability. **The KunstlerCast** Duncan Crary 2011-10-01 Based off the popular podcast, this book collects one man’s conversations with an outspoken social critic on the negative effects of the suburbs. James Howard Kunstler has been described as “one of the most outrageous commentators on the American built environment.” An outspoken critic of suburban sprawl, Kunstler is often controversial and always provocative. The KunstlerCast is based on the popular weekly podcast of the same name, which features Kunstler in dialogue with author

Duncan Crary, offering a personal window into Kunstler's worldview. Presented as a long-form conversational interview, The KunstlerCast revisits and updates all the major ideas contained in Kunstler's body of work, including: The need to rethink current sources of transportation and energy The failure of urban planning, architecture and industrial society America's plastic, dysfunctional culture The reality of peak oil Whether sitting in the studio, strolling city streets, visiting a suburban mall or even "Happy Motoring," the grim predictions Kunstler makes about America's prospects are leavened by his signature sharp

wit and humor. This book is rounded out by commentary, footnotes and supplemental vignettes told from the perspective of an "embedded" reporter on the Kunstler beat. Readers may or may not agree with the more dystopian of Kunstler's visions. Regardless, The KunstlerCast is bound to inspire a great deal of thought, laughter, and hopefully, action. Praise for The KunstlerCast "A bracing dose of reality for an unreal world." —Stephen J. Dubner, co-author of Freakonomics and SuperFreakonomics "Erudite, eloquent . . . with good humor about the hilariously grotesque North American nightmare of

car-addicted suburban sprawl.”
—Dmitry Orlov, author of
Reinventing Collapse “Prepare
to be enlightened, infuriated and
amused.” —Gregory Greene,
Director, The End of Suburbia
“So enlightening yet casual that
the reader feels like they’re
eavesdropping into the den of
Kunstler’s prodigious mind.”

of Leisureville
